

IPHONE · SAFARI

LookLayer on your phone.

Your styling workspace, one tap away. Follow these steps to add a Home Screen shortcut—no App Store download needed.

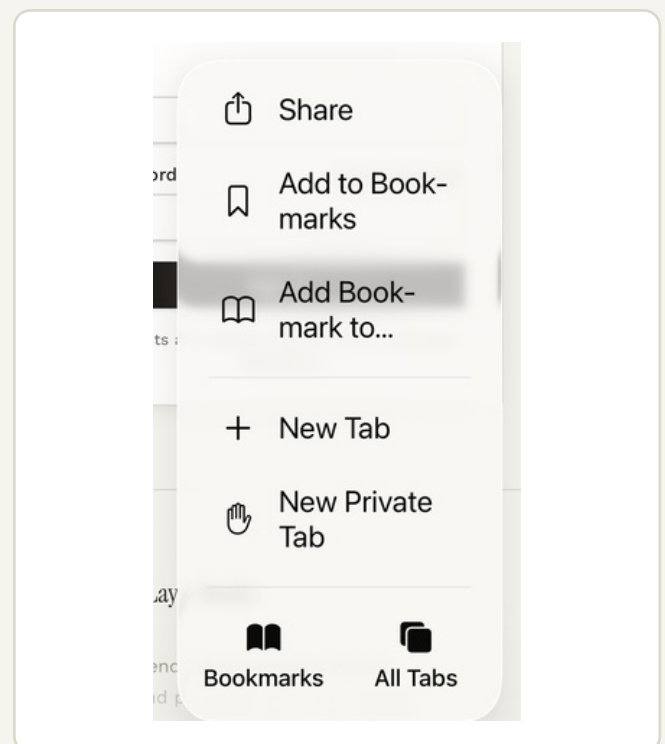

01 Open LookLayer in Safari

Open **Safari** on your iPhone and visit looklayerstudio.com/auth. You can add the shortcut before signing in.

02 Tap Share

Open Safari's **three-dot menu (...)** and tap **Share**. On some iPhones, the Share icon sits beside the address bar.

Start here

<https://looklayerstudio.com/auth>

If the link opens inside an email or messaging app, choose **Open in Safari** first. Safari's controls may look slightly different depending on your iPhone and iOS version.

LookLayer runs online. Internet access is required, and you may need to sign in again.

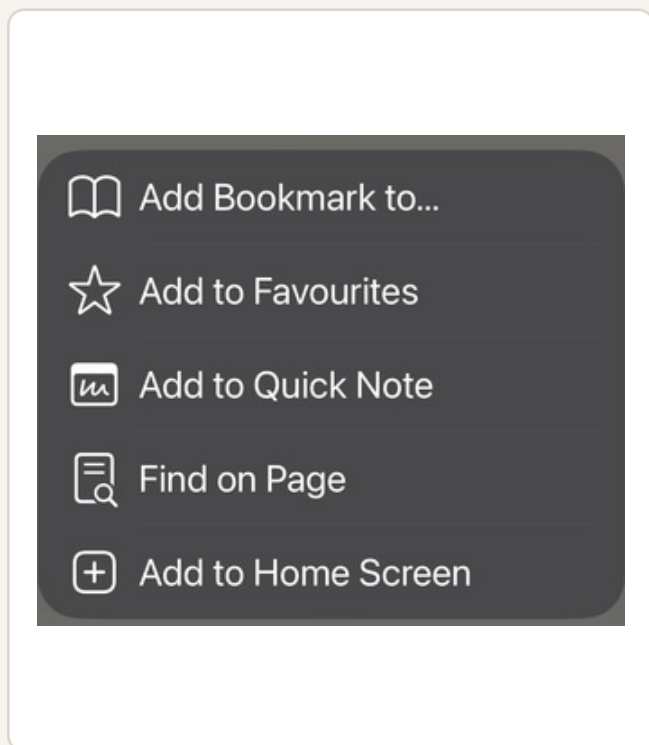

IPHONE • SAFARI

Make it one tap away.

Finish adding the icon, then open your existing studio account.

03 Add to Home Screen

Scroll down the share sheet and tap **Add to Home Screen**. This is different from adding a bookmark.

04 Name it LookLayer

Enter **LookLayer**. Leave **Open as Web App** on if offered, then tap **Add**. Your icon will appear on the Home Screen.

05 Tap the icon and sign in

Use your existing studio email and password. If you haven't set your password, finish your invitation email first. **No new plan or studio account is needed.**

Need help? If Add to Home Screen is missing, open the page in Safari and scroll further down Share. Try Edit Actions if needed. For a forgotten password, tap **Forgot password?** on the sign-in page.

Android: Open the sign-in address in Chrome → three-dot menu → **Add to Home screen**. Choose Create shortcut or Install app if offered, then confirm. Options vary; shortcuts may open in Chrome.
